

# MANUFACTURING TECHNOLOGY

Dear Parents/Guardians:

The Granite Oaks Middle School Manufacturing Technology program provides students with in-depth, hands-on educational experience where we investigate many processes used in industry to manufacture products. Some of the activities available include woodworking with basic hand and machine tools, computer guided vinyl cutting, basic electronics, leather craft, metal casting, sandblasting, laser etching and cutting, and computer numeric controlled router. Students will make three or four projects during the semester. Products created by the students will be brought home and are of impressive quality. They make nice gifts, as well as treasured keepsakes.

Without the generosity and support from families, our Manufacturing Technology experience will be limited to the basics. Therefore, we hope you can contribute \$15 toward the purchase of lumber, sandpaper, finishing supplies, glue, mirror tiles, vinyl, disposable gloves, leather, lacing, metal fasteners, clock movements, batteries, etc.

For more information, you may contact me directly at [bswasey@rocklin.k12.ca.us](mailto:bswasey@rocklin.k12.ca.us). We sincerely thank you for your support.

Brian Swasey  
Manufacturing Technology Instructor

Please check the option that applies to you, detach the bottom of this letter and return it to Mr. Swasey. Checks are preferred to prevent loss and theft, and should be made out to "Granite Oaks Middle School".
