

# HOMework POLICY

## Manufacturing Technology

Homework is rarely assigned in this Elective class. Ample time is given in class for nearly all assignments. When a student chooses not to use the time given in class wisely, they will need to complete the assignment at home. On rare occasions the teacher may ask that an assignment be finished at home due to an unexpected situation such as a fire drill that uses up the allotted class time. Students will need to find time to study at home prior to any tests. Reasonable advance notice will be given. Any time a student misses class they need to complete the work they missed at home. Most work is available on the calendar on my website. You can actually print the assignments from there! Use the link for “Past Calendars” to find work for all prior weeks.
