

Lockers Students will share a Manufacturing Technology locker with a friend. The lock is provided by the school. If the lock gets lost or stolen, the replacement cost is \$6.00. During class keep the lock hooked on your locker so it doesn't get lost. Keep the combination a secret! Only the student and their personally selected partner should know the code. Students should write the code in their binder or safe place in case they forget the number. Last semester the teacher documented 133 times that locks were left open after students left! Ask students to check the lock by pulling down on it before they leave each day to make sure you remembered to lock it. **DO NOT** keep tools in your locker. They are for everyone in all classes to share. We don't have enough for you to keep your "favorite" for yourself.
